FOAM PROCESSING

FOAM PROCESSING

Foam Processing Film Portfolio

The Foam Processing Film Portfolio by Charter Next Generation is vast, yet linked together by the common threads of Quality, Usability, and Sustainability. From Polyurethane Foam Pouring Liner Films that ensure the uninterrupted production of high-quality foam blocks, to protective bagging and packaging, CNG considers the quality of our customers' finished products to be the utmost priority.

Differentiated Competitive Advantage

- State-of-the-art assets with proprietary upgrades
- Constant new technology investment
- World-class manufacturing operations
- Unrivaled materials science, engineering, and sustainability capabilities
- Custom-engineered solutions

Technology Applications;

- Bottom Liner Films
- Sidewall Films
- Top Liner Films
- Carpet Cushion Film
- Foam Lamination Film
- Adhesive Film
- Compression Bags
- Mattress Bags
- Carpet Wraps and Bags
- Top Sheeting

IN-PROCESS FILMS

Carpet Cushion Film

- Forms strong bond with inline laminations
- Soft and quiet films add to the functional appeal of the finished carpet product

Foam Lamination Film

- Bondable directly to Automotive Foam Headliners offering sound abatement and protection from outside air and moisture

Adhesive Film

- Variety of stiffnesses or softnesses ready to be coated for:
 - Mattress manufacturing
 - Furniture
 - Orthopedics
 - Footwear

END-OF-THE-LINE PACKAGING

Compression Bags

- Long duration holds keep mattresses compact and free of undesired exposure

Mattress Bags

- Ensure that the pristine, finished mattress remains unscathed during handling and transit

Carpet Wraps and Bags

- Keep the roll of carpet clean and ready to deliver to the final customer

Top Sheeting

- Broadly protect products from the top of the shipment, particularly if the sides of the top sheet will be secured with stretch film
