STRETCH HOODER FILM

ADVANCED STRETCH HOODER FILM

Our stretch hood films are tailored for **sustainability, increased load stability in transit, optimal moisture levels, mold inhibition and more.** With over 50 years of experience and a track record for developing breakthrough films, CNG is poised to design the right stretch hood film for your application by **listening, developing, and partnering** in every step of the process.

STATE-OF-THE-ART FILM SOLUTIONS:

CNG stretch hood films were designed after we understood our customer applications. Since no two operations within the same industry are the same, it's important to have a film partner that is ready to develop material to meet the exacting needs of your unique demands. Certainly, there are common threads between markets, and CNG has developed materials that will perform in every case, but when something extra is needed, CNG is the partner that can go the extra mile with you and offer a package specifically for you.

CNG Stretch Hood Films Offer:

- High load containment
- All weather pallet protection
- Lighter and stronger material
- Reduced cost per load
- Increased throughput
- UV protection for up to 24 months in most regions in the U.S.
- Condensation control
- Aesthetically pleasing finished packages
- Clarity for ease of bar code scanning

CNG STRETCH HOOD FILM IS PART OF THE EQUATION:

Any high performing stretch hood program requires 3 parts:

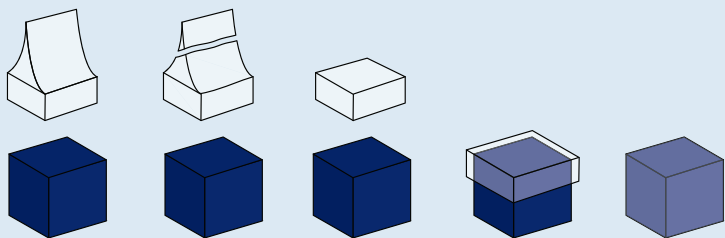

1) Film 2) Equipment 3) Service and Support. Finding a film partner that understands this is a major milestone in the development of your program. CNG stretch hood films will forgive variance between OEM systems while never compromising the performance you seek hood after hood. Staying connected, present and visible with our customers and collaborating with equipment and service teams, CNG delivers innovation you can depend on.

THE NEXT GENERATION OF STRETCH HOOD FILMS:
