POLYETHYLENE FILMS

WHITE CAVITATED MDO POLYETHYLENE

Introducing Recyclable Polyethylene White Cavitated MDO Film

As the flexible packaging industry looks to move into more sustainable options, CNG is here with a solution. We have created a recyclable white cavitated MDO polyethylene (PE) film to meet application requirements historically met by non-recyclable oriented polypropylene (OPP).

Features and Benefits

- Meets NextTrex and How2Recycle guidelines for store drop-off recycling
- Excellent opacity: 75%+ at 1.5 mil
- Improved yield vs conventional high opacity PE films
- Density below 1.0 for ease of recycling
- Low and consistent machine-direction tear, will not tear in transverse-direction
- Good toughness, great stiffness
- High tensile strength for good printability

Target Applications

- Confection
- Snacks
- Ice Cream
- Tag and label
