SUSTAINABLE FILMS

We passionately pursue sustainable solutions to create a better world.

As North America's leading independent producer of high-performance specialty films, our entire team accepts our collective responsibility to engineer tomorrow's best and most sustainable film solutions, today.

Our award-winning portfolio of GreenArrow™ films utilizes the latest in polymer and processing technologies for sustainable solutions that do not forfeit quality or performance. Our dedicated team is prepared to guide you down the path of meeting your sustainability goals for recyclability, recycled content incorporation, and alternative material utilization.

ISCC
International Sustainability
& Carbon Certification

TÜV
