CHEESE PACKAGING

# POUCHES/LINERS/ TUBESTOCK

Charter Next Generation (CNG) offers a complete portfolio of pouches, liners, and tubestock designed to protect the cheese as it progresses through the aging process. Our materials have an aggressive sealant to ensure a hermetic seal is made while running efficiently on the packaging machinery. CNG's production process enables our product to maintain a consistent pouch/tube dimension which helps maintain the block uniformity. Uniform cheese blocks will minimize trim waste as the block is further processed. CNG has a strong reputation for product consistency and outstanding service and support.

## Features and Benefits

- Strong sealant
- Good contact clarity
- Outstanding barrier (oxygen & moisture) to maintain product quality
